The information below is based on all companies reporting MCAS **Private Passenger Auto** data to the Commonwealth of Kentucky for the year 2009. You can compare your company’s results to the statewide averages for Kentucky listed on each table. For each ratio, there is a chart indicating the number of reporting companies whose ratios fall into each range of values.

If your company’s ratio is listed as 9999.9%, it is an indication that activity was reported for that category but a valid ratio could not be calculated. For example, if your company reported non-renewal activity but no policies in force, the ratio of non-renewals to policies in force would show as 9999.9%.
